

PRESS RELEASE

Kendallville –The Four County Area Vocational Cooperative is pleased to announce that the Welding Program located at 892 Dowling Street, Kendallville is officially recognized as an American Welding Society Accredited Testing Facility (ATF).

FCAVC welding students and the surrounding communities will benefit immensely from this accomplishment. Students and adults completing courses and testing through this facility can now be officially certified through this site.

Currently FCAVC has 52 high school students enrolled in the certified welding program in addition area adults are able to take advantage of this training through programming offered by The Freedom Academy.

FCAVC commends our instructors Pat Perkins and Rex Rawles for the extraordinary work necessary in making this possible. FCAVC also wishes to thank the welding advisory board for their leadership and guidance in this area. The Cooperative is extremely grateful to the Dekko Foundation as they provided the needed funding to make this certification possible.

If you need additional information regarding welding certifications, this information can be found at www.fcavc.org.

FCAVC will be offering 15 certifications in the following areas:

D1.1 Structural Steel Limited Thickness in GMAW and SMAW processes; all positions

D1.1 Structural Steel Unlimited Thickness in the GMAW and SMAW processes; all positions
