

AUTO BODY COLLISION REPAIR

Location:

FCAVC, Kendallville, IN

Course Description:

Formal training in Auto Body Technology is highly desirable because advances in technology in recent years have greatly changed the structure, components, and even materials used in automobiles. Our program is designed to provide the latest in practical, hands-on coursework driving by current industry standards and the basic skills required for employment in the auto body industry. All phases of auto collision damage, repair, replacement and repainting will be covered. Some techniques include welding, masking, sanding and painting.

Program Duration:

Students may enroll in the Vocational Auto Body Collision Repair Program for one or two years beginning with their junior year. No prerequisites are required for this program, however; a strong desire to pursue a career in the automotive industry is recommended.

Credits:

Students enrolled in Auto Body Collision Repair receive credit based upon the type of schedule offered at each school. Students will also be eligible to earn dual credits through Ivy Tech Community College.

Enrollment Procedure:

Students need to contact their Guidance Counselor for an application.

Fees:

Students will pay for material and supplies used for personal projects.
